Federally Funded R and D Centers - U S Government Accountability Office (G - 2013-07

The U.S. Government Accountability Office (GAO) is an independent agency that works for Congress. The GAO watches over Congress, and investigates how the federal government spends taxpayers dollars. The Comptroller General of the United States is the leader of the GAO, and is appointed to a 15-year term by the U.S. President. The GAO wants to support Congress, while at the same time doing right by the citizens of the United States. They audit, investigate, perform analyses, issue legal decisions and report anything that the government is doing. This is one of their reports.

The Size and Scope of the Non-profit Sector
The Size and Scope of the Non-profit Sector in South Africa - Mark Swilling - 2002
This book discusses the results of the study about the non-profit sector in South Africa. The study was conducted by the Institute of Policy Studies at John Hopkins University in the United States and the Graduate School of Public and Development Management (P&DM) at the University of the Witwatersrand in South Africa. An agreement between these institutions five years ago led to the launch of the South African Non-Profit Sector Study at P&DM, in association with an international comparative study based at the Center for Nonprofit Studies at Johns Hopkins University. The intention was to produce information on the entire South African non-profit sector following a standard format which would allow comparisons to be made with the non-profit sectors of other countries.

Private wants and public needs; issues surrounding the size and scope of government expenditure. Edited with an introduction by Edmund S. Phelps. Revised ed - Edmund Strother PHELPS - 1965

A Procedure for Estimating the Size and Scope of the Medically Indigent in the Appalachian Region - Katherine Swartz - 1987

Scope of the Medically Indigent in the Appalachian Region - Katherine Swartz - 1987

Federally Funded R&D Centers - DIANE Publishing Company - 1997-02
This report describes: funding and staff size of the Federally Funded R&D Centers (FFRDC); extent of subcontracted FFRDC work; structure of the parent organizations; missions, core competencies, and capabilities of the FFRDC's sponsors' criteria for defining core work; and sponsors' oversight mechanisms and responsibilities. Overall funding for DoD's FFRDC's increased by about 23%, from almost $1.4 billion in FY 1985 to a peak of approximately $1.7 billion in FY 1990. Since FY 1990, funding for DoD's FFRDC's has decreased by almost 26% to about $1.3 billion in FY 1995.

A Downsian model of electoral competition and forward-looking voting indicates that majoritarian -- as opposed to proportional -- elections increase
The Size and Scope of Government - Torsten Persson - 1998

We try to demonstrate how economists may engage in research on comparative politics, relating the size and composition of government spending to the political system. A Downsian model of electoral competition and forward-looking voting indicates that majoritarian -- as opposed to proportional -- elections increase competition between parties by focusing it into some key marginal districts. This leads to less public goods, less rents for politicians, more redistribution and larger government. A model of legislative bargaining and backward-looking voting indicates that presidential -- as opposed to parliamentary -- regimes increase competition between both politicians and voters. This leads to less public goods, less rents for politicians redistribution, and smaller government. We confront these predictions with cross-country data from around 1990, controlling for economic and social determinants of government spending. We find strong and robust support for the prediction that the size of government is smaller under presidential regimes, and weaker support for the prediction that majoritarian elections are associated with less public goods.

A Study of the Size and Scope of the Farming Projects of Kansas Vocational Agriculture Students - James Dale Dobkins - 1953

This paper assesses changes in the size and scope of government in 24 transition economies. Whereas these governments have retrenched in terms of public expenditures in relation to GDP, as well as public employment as a share of population, some indicators suggest that size remains high (e.g., rising indebtedness, a heavy regulatory burden, and prevalence of noncash transactions). At the same time, the scope of government activities-although evolving-has not necessarily become appropriate. This paper provides some recommendations for aligning the scope of government with the increasing market orientation of these economies.

The illustrated series soft skills titles are designed to make it easy to teach students the essential soft skills necessary to succeed in today's competitive workplace. Each book and companion course mate cover 40 critical skills, providing students with extensive knowledge they can bring with them into the real world. Course mate brings each text to life with an audio visual eBook, scenario videos, access to career transitions, interactive activities for reinforcement, and engagement tracker, a first-of-its-kind tool that monitors student engagement in the course! Important notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Graduate medical education - 2012
The department of health and human services (HHS), through the Centers for medicare and Medicaid services, is the single largest funder of graduate medical education (GME). This is the training that medical school graduates receive as residents in more than 1,000 of the nation's hospitals, known as "teaching" hospitals. These trainees are a key part of the labor supply at these hospitals. Now, amid efforts to reduce federal spending, these GME monies face possible reductions and other changes. The Obama administration and some members of Congress want to cut back on GME funding. Many hospitals, medical schools, and medical associations are opposed, and they actually want to increase funding and residency slots to train more doctors. Besides the costs of the public subsidies to medical education, other issues at stake include whether or not the nation is training enough doctors or other health professionals, and what the impact would be of increased accountability for the subsidies. This Health Policy Brief provides background on graduate medical education funding and delineates the arguments on various sides of the debate.

**Transition Economies** - - 2001

**Who Knew Australians Were So Co-operative?** - Richard Denniss - 2012

**Principles and Practice of Constraint Programming** - Michel Rueher - 2016-08-22
This book constitutes the refereed conference proceedings of the 22nd International Conference on Principles and Practice of Constraint Programming, CP 2016, held in Toulouse, France, in September 2016. The 63 revised regular papers presented together with 4 short papers and the abstracts of 4 invited talks were carefully reviewed and selected from 157 submissions. The scope of CP 2016 includes all aspects of computing with constraints, including theory, algorithms, environments, languages, models, systems, and applications such as decision making, resource allocation, scheduling, configuration, and planning. The papers are grouped into the following tracks: technical track; application track; computational sustainability track; CP and biology track; music track; preference, social choice, and optimization track; testing and verification track; and journal-first and sister conferences track.
