Tracking with Poverty in Mind: How generous book offers can benefit children, families, and communities across the United States and demonstrate how schools can improve the academic achievement and readiness of economically disadvantaged students. Jensen, a professor at the University of California, Los Angeles, and director of the UCLA Prevention Research Center, will discuss how poverty affects children's development, and how the mind deals with words.

Jensen argues that although chronic exposure to poverty can result in detrimental changes to children's development, there is no evidence that the fundamental cognitive abilities that govern the functions of reading and writing are impaired by poverty. He will argue that policymakers can help children overcome the cognitive effects of poverty by providing them with high-quality early childhood interventions, access to preschool, and high-quality education programs.
